Benifits of Attendance Systems

School Administration

The most significant issues are attendance tracking and data administration, according to colleges, schools, coaching facilities, and educational organisations. For school administrators, the advent of biometric verification and presence monitoring software has thankfully made life easier. The use of such cutting-edge technologies.

Parents

The parents' module in Attendance Systems is designed to give parents comprehensive information about their children's performance.

Their exam information, schedule, attendance history, results acquired, etc., are just a few activities that can be quickly viewed with a mouse click. It makes it easier for parents and teachers to communicate openly.

They are always welcome to speak with the teachers and ask any questions they may have concerning the students' academic progress or the school's curriculum.

Office

Managing staff attendance and timekeeping is one of the main issues that employers and business owners confront. Your greatest asset is your workforce, so it's critical to keep precise records of their working schedules, shifts, and vacation time. In fact, it could significantly alter how your company runs, as well as increase production and efficiency. Employers used a manual system in the past to monitor employees' attendance. The employees' productivity and efficiency fell as a result, and there were several payroll problems.

RF- ATTENDANCE

Radio frequency Based Students Attendance Automation System

RF-ATTENDANCE provider robust, secure and automation attendance management in school. Students faculty & staff attendance management becomes easier. efficient and accurate.

It automates -

Process of student registration and ID card printing
Attendance recording
Daily SMS to parents
Data processing on Attendance server
Attendance report for school

We offer two technologies for Attendance-

L.F Low Frequency

If your student bellow 300 We use LLF

UHF Ultra High Frequency

If your student more then 300 We use U.H.F

How it use?

We just change your student's normal ID card. And give our world best UHF RFID card. The information related to the student will be attached to the smart card. When the student enters the school with card the reader at the gate will automatic detect the card. The reader will detect the card and intimate the system and system will recognize the tag according the information stored as per the given record. Then the system will sent notification SMS to the parents that their child has entered in the schooland the same time the system will store the information for the report purpose. At the time of leaving from the school premises. the svstem will sent notification SMSto the parents again and will also store the data

Benefits of RF-Attendance For School

It will add value to the school's image by showing the parents that you care for the security of their children. It will also reduce irregularities and bunks of the students. The system will help the authority to simplify the whole administration work, save resources and time.

- : Every day school gets automatic attendance report via hard and soft copy.
- : Free student Identity card for each student.
- : Free Staff attendance with digital payroll management systems.
- : Free SMS templates with Bulk SMS facilities to sent for alert about holiday, notice, event etc
- : Schools can track their valuable vehicle position, speed and lot more."
- : Schools can use Library management system.
- : We advertise your school profile in our worldwide most popular website.

We provide complete Payment Management option for school such as bellow:

- : Online payment receives from guardians..
- : Cash payment uploads option.
- : Automatic sent SMS to parents after every successful payment and reminder for payments.

Benefits RF- Attendance Systems For parents

Benefits of RF-Attendance For Parents-

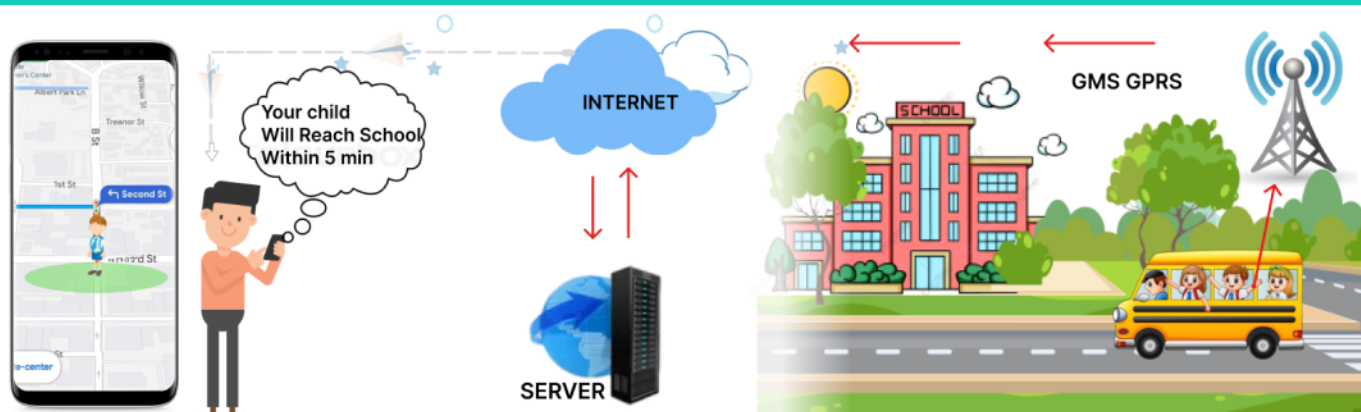

Thousands of students go missing from school in India every year, In nearly all these cases, the student did not report to school, or left school in time to not return home and we never knew of this until it was very late...if the parents or the school authorities could have known in time that the untoward delay/ absence of reporting is unnatural, we could have stopped the tragedy. In our system the Parents will get the notification SMS at least twice in a day so they can relax and concentrate on their work

- : Parents get instant SMS alert for holiday, notice, event etc
- : Parents can check their child attendance record, payment status and marks online and also his/her classmate's toper marks.
- : Parents also track the school bus position.
- : Parents can pay their child feos online without any extra cost
- : Improved relationship and communication between school authorities and parents.

How RF-Attendance System Works ?

- : In a typical RFID Attendance system setup there is a RFID device installed.
- : Tracking, monitoring, and identification of students in school premise and in GPRS-enabled school buses in real time.
- : Tracks late entries, yearly outs, presence in premise but not attending class
- : Daily, weekly, monthly. yearly absentee/attendance report
- : Records and maintains attendance of teachers and other school staf.
Reduced use of paper.
- : This device is connected with the attendance system server housed in the school
- : Every student is given RFID ID card with pre-Printed lanyards, Holders. All relevant photo-class, section, phone... etc is printed by company.
- : Each day the attendance will be registered with the help of RFID device. The RFID attendance system server will download the attendance data at a pre-set time.
- : It will process the attendance and send a set SMS message to the parents / guardians of the student via RFID Attendance system SMS gateway server.
- : The attendance record is update on Attendance web server. Parent can log in and view attendance apply on-line for ward's leave so that school is aware of leave in advance.
- : They can also check Home work given to their ward.
Improved relationship and communication between school authorities and parents
